

Monday 10<sup>th</sup> September.

A good start to the day.

Students were pretty settled.

Expectations were clear. Handwriting was a good way to start. Children worked quietly and you monitored the students work well. In future, year ones normally do a different sheet from year two students.

Comprehension: good choice of book to encourage prediction. Encourage chn to share with others what they have written.

Watch noise level. Monitor difference between working noise and talking. Don't talk over students. Wait for quiet before giving instructions.

After Lunch

\* Science was good. The method of writing the experiment was done well. Remember to encourage chn to share <sup>and learn</sup> from each other.

MATHS

- Good use of concrete materials. (after recess)
- Make sure you allocate enough time to Maths and R.E.
- Some chn in circle were not focused.
